

PROJECT PITCH

Owner/s:

Jacob Logan, Waqas, Jonathan Yeminy

App title:

Tech Trivia Tango

Git Repository:

https://github.com/jonathanyeminy/Phase_1_Group_Project_Trivia_Game

One sentence app description:

This app will be a trivia game that tests the user's knowledge of computer science.

Type of events: click, submit, change, DOMContentLoaded

External API link: https://opentdb.com/api_config.php

Additional Comments:**Timeline:**

Friday/Weekend:

Monday: Submit pitch, get it reviewed

Tuesday:

Wednesday: MVP

Thursday:

Friday: Present!

User Stories:

As a **user**, I want to be able to:

- See the questions one at a time and submit my answers. (GET request)
- Upon submission of an answer, change the question displayed and mark if the answer was correct or not. (Update the DOM)
- If the user gets three questions wrong, the quiz will end, and the user will be offered a chance to retry. (Update to the DOM)
- If the user gets all 10 questions right, they will be declared the winner, and be stored in the "Hall of Fame" section. (Update to the DOM)

Stretch Goals:

E.g. As a **user**, I want to be able to:

- Add styling
- Persist the Hall of Fame

In addition to filling out this template, please include wireframes in your project pitch. Wireframes are rough sketches of how your front-end user interface is going to look. Include headers, nav bars, buttons, text areas, etc. You can use microsoft paint, drawing on your iPad, or some other software that allows you to draw/arrange shapes to look like a user interface.
